

## REPORT

**Event Title:** Seminar on Big Data

**Date:** 24<sup>th</sup> August'18

### **Particulars:**

1. A wealth of knowledge on Big-data was proposed to students. Big-data is a powerful tool, providing rise in demand for Analytic Professionals perceiving highest paid salaries.
2. Learners were enlightened with a technique of Big Data i.e. HADOOP, a sensation in the field of Data Science which was worth knowing for TYBSc students.
3. Inspiration to students was provided to endeavor Big Data as career since this is an emerging field in Computer Science. Big data analytics has not only allowed the firms to stay updated with the changing dynamics but has also let them predict the future trends giving a competitive edge.
4. Case study on Map-Reduce method of HADOOP was taught to students.

### **Highlights of the workshop**

**Resource person Ms. Pallavi kadam interacting with students**
