

Green Campus Policy, Practice and Principle

Introduction

Policy to help inculcate eco-friendly way-of-life at college campus. Spread awareness of environment friendly conduct at campus in particular & society in general.

Objective and Policy Statement

- To help promote sustainability of nature that shall sustain humanity.
- To help promote sustainability of nature that alone shall furnish humanity ability to live life with dignity and in concurrence with nature.

Practice & Principle

- Recycling of waste water and solid waste at campus,
- Promotion of use of cycles, battery operated vehicles, public transportation etc. to reduce fuel consumption,
- Parking free for eco-friendly vehicles,
- Plastic use prohibited at campus, which shall result in eventual disuse,
- Paperless communication,
- Organic awareness, education and training drive,
- Installation of infrastructure that shall help reduce carbon footprint,
- Use of energy efficient LED lights,
- Installation and maintenance of solar panels,
- Conducting Environment and Energy Audits periodically,
- Display of signboards with energy conservation messages in and around campus,
- Electrical and electronic devices to be kept off, when not in use,
- Maximum use of daylight for various college activities,
- Maintenance of requisite infrastructure

The policies, procedures & standards designed by the College are in recognition of the demand of the current situation, which shall progressively undergo the desired modifications to suit the demand of emerging times.
