

Sweden Exchange Programme

Exploring opportunities and providing opportunities are the motives that the students live by in the college. Our college leaves no stone unturned in helping us provide opportunities to explore ourselves. Just another small gaze on our trip to Sweden.

Our college has associations with Globala Gymnasiet College, Stockholm, Sweden. Every alternate year teachers and students of respective college visit the other country to learn about the culture, environment and everything that the new land offers to its travellers.

A group of 2 Professors and 19 students visited our city of Mumbai in the month of January and in the following month of May - June, Professor Manisha Kayande and Professor Kunal Soni along with Trusha Pathak, Suryaja Salvi, Prachi Sawant, Raj Thakur, Aditi Nagap, Apurva Khilare, Shweta Vineekar, Viraj Karandekar, Dipika Singh, Shital Dhuri, Shreya Suhas and Rohitash Sharma of Maharshi Dayanand College, Mumbai took a flight on 30th of May 2017.

The next day, we met with the Member of the Parliament, Jens Holm who is from the Left party and works on the betterment of the environment and focuses on climate changes. In the next couple of days we visited, Hogdalen's Wastemanagement & Bio, Bee Urban Plantation, Vasa Museum, Nobel Museum and Urban City Planning sites. We also had the opportunity to visit the summer houses that are built in the outskirts of the city.

Lectures organized on Educational and Cultural system helped us deepen our understanding of their society. Special lectures were hosted by the WWF to help us understand and model a toy town of our design and how one of the cleanest countries in the world manage their waste so well that they feel the need to export waste from different countries to dispose them off.

Students also conducted studies about the Green corridor scheme. In another project people were interviewed about their ethnicity and a short film defining the racist tendency of the society was made. All and

all the trip to the capital city of Sweden, Stockhlohm has been an experience that has moulded us into beings that look forward to making a greener plant that has pure air and clean waters and lush green forest planetd all along face of earth.

We the members of Environment Ambassador, have taken it upon us to make the earth a better place for us and for the future generations that look up to us to provide them with a better lifestyle.
